

Market study: Milling technology in German-language toolmaking

Approach

- Joint definition of a questionnaire to determine the use of milling technology in the toolmaking sector in German-speaking countries
- Determination of the tool manufacturing companies to be investigated as a data basis for the systematic identification of potential market trends in the milling sector
- Detailed examination of the state of the art, the future developments of milling technology and the inclusion of requirements for the services offered by a milling tool manufacturer
- Detailed evaluation of the results from the questionnaires as a basis for decision-making for a strategic orientation of future development projects in the toolmaking product segment

Aufbau des Fragebogens

Results

- ▶ **Detailed overview of the milling technology in German-speaking tool construction**
- ▶ **Identification of market trends in the field of milling technology**
