Price and Cost Analysis – Methodology
Implementation of Permanent Structures for Cost Analysis
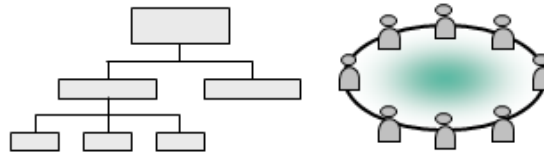

Aligned Target System
Process

L0   L1   L2   L3/R   L5

What does the process require and how must the process be designed?

Organization

What is the fitting form of organization and how can it be embedded? What roles have to be defined?

Methods

Price per unit — Performance parameter — Regression — Best practice

Acquisition risk (correct / incorrect) — Result flow (correct / incorrect)

Which methods are applicable for various objects of purchase?

Fraunhofer IPT

WZL RWTH AACHEN
